Supply High Quality Malic Acid CAS 6915-15-7

Basic Info:

Appearance:	White Crystal Powder
CAS No.:	6915-15-7 / 617-48-1
Formula:	C ₄ H ₆ O ₅
EINECS:	210-514-9
Certification:	ISO
Packaging:	25kg net paper bag or 1mt big bag with PE liner
Storage :	Stockpiled at the ventilated place, avoiding rain, moisture and insolation. Please handle with care to prevent bag damage, away from toxic substances.
Origin:	China

Product Description:

Malic acid is stable under normal conditions and hygroscopicity at high humidity. Triclinic crystal white crystal. Melting point is 130 °C; Relative density 1.601; Solubility is soluble in methanol, ethanol, acetone and many other polar solvents.

Usage:

Malic acid can be widely used in candy, cool drinks, frozen foods and other types of food. Such as for processing and configuration of beverages, dew wine, fruit juice, also used in Jam, etc. . It can also be used for adjusting the PH of yoghurt fermentation and removing tartrate in wine brewing. it is used as a sour agent, color retention agent, preservative, and emulsification stabilizer for egg yolk, etc., and also used in pharmaceuticals, as acid regulator, preservative preservative, anti-caking agent. At the same time can also play in the final product slow-release, lasting, soft, anti-stick significant effect. DL-Malic acid can also be used as pharmaceutical intermediate, cosmetic, rinse, metal cleaner, buffering agent, retarder in textile industry, fluorescent whitening agent of polyester fiber.
